Camera Microphones VC Module

## Variants

48 Million + 8 Array

## Details

### Product Description

The **48MP Camera with 8-Array Microphones VC Module** is an advanced video conferencing solution designed to deliver exceptional video and audio quality for professional meetings and virtual collaborations.

### Key Features:

**48MP Ultra-Wide Camera:** Captures high-resolution video with a wide field of view, ensuring all participants are clearly visible.

**8-Array Microphone System:** Equipped with eight beamforming microphones that provide 360-degree voice pickup, ensuring clear audio capture from all directions.

- **AI Noise Reduction:** Utilizes advanced algorithms to minimize background noise, enhancing voice clarity during calls.
- **Plug-and-Play Connectivity:** Designed for easy integration with various conferencing platforms and systems, facilitating quick setup and use.
- **Compact Design:** Sleek and unobtrusive, making it suitable for various meeting room setups.

## **Applications:**

- Ideal for corporate boardrooms, remote education, telemedicine, and any environment requiring high-quality video conferencing capabilities.
