Rack

Details

Floorstanding Rack is a robust and reliable solution designed for organizing and protecting networking and server equipment in data centers, server rooms, telecom sites, and IT installations. Built with a strong steel frame and a durable powder-coated finish, this rack supports standard **19-inch rack-mount devices** such as servers, switches, patch panels, routers, and power distribution units. The floor-mounted design ensures high load-bearing capacity and excellent stability for medium to large network setups. It features proper ventilation for efficient airflow, secure lockable doors for equipment safety, and convenient cable entry points for clean cable management. Ideal for professional networking environments, the Floorstanding Rack provides a neat, secure, and scalable infrastructure solution for modern IT networks in Nepal.
