Details

Telephone Converter 32CH – Fiber Optical Voice Converter

The 8CH Telephone Converter is a high-performance optical media converter designed to transmit up to 32 **analog telephone channels** over a single fiber link. It supports long-distance communication up to **20 km** using single-mode fiber, making it ideal for telecom, enterprise, and campus networks.

Key Features

32 Voice Channels	Supports 32 independent analog telephone lines
Fiber Transmission	Single fiber link with SC / FC connector options
Distance	Up to 20 km over single-mode fiber
Voice Quality	PCM encoding ensures clear and stable audio
RJ11 Interface	Compatible with analog phones and PBX systems
Design	Robust and reliable for telecom applications

Technical Specifications

Category	Specification
Product Type	32CH Telephone Fiber Converter
Voice Channels	32 x RJ11 Analog Ports
Optical Interface	SC / FC (Optional)
Fiber Type	Single Mode Fiber (SMF)
Transmission Distance	Up to 20 km
Encoding	PCM (Pulse Code Modulation)
Interface Type	RJ11
Application	Voice over Fiber
Installation	Desktop / Rack-mounted

Typical Use Cases

Extending telephone services between buildings

PBX connectivity over fiber networks

Enterprise and campus communication systems

ISP and telecom voice integration

Replacing long copper cable runs

Advantages of Fiber Voice Transmission

No signal interference or noise

Supports long-distance communication (up to 20 km)

More stable than copper cable

Ideal for FTTH / FTTx networks
