Server Rack 800 MB800

Server Rack 800 MB800

Variants

12U Wall Mount 42U 32U

Details

The **MB800 Server Rack Cabinet** is a high-quality rack enclosure designed for data centers, enterprise networks, telecom rooms, CCTV infrastructure, ISP deployments, and server installations. Built using premium SPCC cold-rolled steel, it provides superior equipment protection, cable management, airflow efficiency, and long-term durability.

Load Capacity	**800KG**
Protection	**IP20**
Material	**SPCC Steel**

Cooling

Silent Fans

International Standards

ANSI / EIA RS-310-D IEC297-2 DIN41491 PART1 DIN41491 PART7 ETSI Standard

Key Features

? High-quality SPCC cold-rolled steel construction

? Front mesh door with hexagonal ventilation design

? Rear mesh door with optional dual-door configuration

? Removable side doors with quick-release system

? Adjustable cable entry from top and bottom

? Adjustable front and rear mounting rails

? U-marked rack rails for easy installation

? Silent cooling fan system pre-installed

? Supports castor wheels and leveling feet together

? Professional electrostatic powder-coated finish

Material & Thickness

Component	Thickness
U Upright Columns	2.0 mm
Door Panels	1.2 mm
Top Cover	1.2 mm
Bottom Base	1.2 mm
Shelf	1.2 mm

Standard Accessories

- Front Mesh Door
- Rear Mesh Door
- Removable Side Doors
- Cooling Fan Tray
- Rack Mount Rails
- Cable Management Slots
- Castor Wheels
- Support Feet
- 40 Sets M6 Mounting Screws

6-Bit Power Socket

Surface Treatment Process

Degreasing Pickling Rust Resistant Phosphorization Pure Water Cleaning Electrostatic Powder Coating

Applications:

Data Centers • Enterprise Server Rooms • ISP Infrastructure • Telecom Networks • CCTV Systems • Fiber Optic Networks • Core Network Equipment • Switches • Routers • Patch Panels
