Clip Wire /Bending wire

Clip Wire /Bending wire

Variants

2MM 1MM

Details

The **Clip Wire (Bending Wire)** is a flexible and durable wire designed for cable management, support fixing, bundling, hanging, and general industrial applications. Manufactured using galvanized steel or stainless steel with PVC coating, it provides excellent flexibility, corrosion resistance, and long-lasting performance.

Available in **1mm and 2mm diameters**, this wire is easy to bend, shape, and install, making it suitable for fiber optic installations, telecom projects, networking systems, electrical work, and general fastening applications.

Diameter	**1mm / 2mm**
Length	**100M Roll**
Material	

Steel

Color

Black

Key Features

? Flexible and Easy to Bend

? PVC Coated for Better Protection

? Corrosion Resistant Construction

? Suitable for Indoor & Outdoor Applications

? Stable Holding Strength

? Ideal for Cable Routing & Support

? Long Service Life

? Available in 1mm & 2mm Sizes

Technical Specifications

Parameter	Specification
Product Name	Clip Wire (Bending Wire)

Parameter	Specification
Diameter	1mm / 2mm
Material	Galvanized Steel / Stainless Steel
Coating	PVC Coated
Flexibility	High Flexibility for Easy Bending & Shaping
Strength	Moderate Tensile Strength with Stable Holding
Length	100 Meters per Roll
Outer Diameter	1mm / 2mm
Color	Black

Applications

- Fiber Optic Cable Management
- Telecom Network Installations
- Cable Bundling & Routing
- Rack & Cabinet Cable Organization
- Electrical & Industrial Applications
- General Support Fixing & Fastening

Available Variants

Choose the suitable diameter according to your application requirements: **1mm Clip Wire** or **2mm Clip Wire**.

Note:
Please select the correct wire diameter (1mm or 2mm) before ordering. Suitable for both indoor and outdoor cable support and management applications.
