Details

Product Description:

Steel Banding – Heavy-Duty Strapping Solution

Steel Banding is a robust and reliable strapping material designed to secure heavy loads during storage or transportation. Made from high-tensile steel, it offers excellent resistance to stretching, impact, and harsh environmental conditions.

Key Features:

- **High Strength:** Manufactured from cold-rolled carbon steel, providing superior tensile strength for securing heavy-duty loads.
- **Durable Finish:** Available in painted and waxed finishes to enhance corrosion resistance and facilitate smooth tensioning.
- **Versatile Sizes:** Offered in various widths and thicknesses to accommodate different load requirements.

- **Reliable Performance:** Ideal for applications requiring minimal stretch and maximum holding power.

Specifications:

- **Material:** High-tensile carbon steel.
- **Finish:** Painted and waxed for enhanced durability.
- **Width Options:** Commonly available in 1/2", 5/8", and 3/4" widths.
- **Thickness:** Varies based on specific application needs.
- **Packaging:** Supplied in coils, with options for ribbon-wound or oscillated formats.

Ensure proper handling and storage to maintain the integrity of the steel banding, especially in outdoor or humid environments.
