

IK-W7 (11AC 1167Mbps Wireless Panel Access Point)

IK-W7 (11AC 1167Mbps Wireless Panel Access Point)

Details

Product Details:

Model? IK-W7

Wireless Standards:IEEE802.11 a/b/g/n/ac

Interface:4*10/100/1000 Base-TX port

User Capacity:60+

Frequency:2.4GHz ,5GHz

Dimension:120×86×43mm

Power Supply:48V POE

Transmit Power:20dBm

Cover Radius:10m

Function?

Full Gigabit Ethernet port dual-frequency panel AP

Dual-frequency ceiling AP, supporting both 2.4G and 5G networks;

Support 802.11ac wave2 2 × 2MU-MIMO wireless architecture;

Support WPA-PSK?WPA2-PSK?WPA-PSK+WPA2-PSK;

Support 5G priority access and fast roaming;

Support one key online upgrading;

Support SSID Vlan, divide Vlan for SSID;

Support Chinese and English SSID, SSID independent setting and hiding;

Support wireless roaming, experience a better network on the move;

Support independent setting of signal strength and channel;

Support intelligent AC unified management, easy management and maintenance;

Support custom AP start time period and scheduled restart
