Details

Face Plate ONU XPON HSGQ-853

The Face Plate ONU XPON HSGQ-853 is a smart solution for neatly terminating fiber lines in GPON / XPON deployments. Once the incoming drop cable reaches the wall, the installer can feed it into the faceplate, splice it to the short pigtail, and secure it inside the enclosure.

The ONU then connects using a short patch cord or pigtail, keeping the installation clean, organized, and professional. This design eliminates exposed fiber loops and messy wiring, making it ideal for residential and small business FTTH installations where both performance and appearance matter.

Technical Specifications

Category	Specification
Product Type	Face Plate XPON ONU
Model	HSGQ-853
Panel Size	86 mm × 86 mm
Installation	Wall-mounted or Desktop Placement
Ethernet Port	1 × 10/100/1000 Mbps Adaptive Port
Voice Port	1 × FXS (Voice Port)
PON Mode	Supports EPON / GPON with Auto Switching
ONU Mode	Supports HGU & SFU Modes
Transmission Distance	Up to 20 km

Category	Specification
Design Feature	Elegant, Compact & Space-Saving Design
