Details

Product Overview HSGQ GPON SFP:

Small Form-factor Pluggable (SFP) modules are compact, interchangeable transceivers that bring flexibility and scalability to high-speed data transmission in telecommunications and networking. Their hot-pluggable design allows for hassle-free insertion and removal from compatible devices without disrupting operations. This translates to quicker upgrades, replacements, or reconfigurations, minimizing downtime and simplifying maintenance. SFP modules are versatile, supporting various data rates and protocols like Gigabit Ethernet, Fast Ethernet, and Fiber Channel. They come in different types, like single-mode and multi-mode, catering to diverse network needs in terms of distance and bandwidth.

Features

- a. Single Power Supply 3.3V
- b. Small Form-factor Pluggable (SFP)
- c. Digital diagnostic monitor compatible with SFF-8472
- d. Compliant with ITU-T G.984.2
- e. Integrated WDM filter for dual wavelength Operate at 1490 Tx/ 1310nm Rx
- f. 1490nm DFB continuos-mode transmitter
- g. 1310nm burst-mode APD-TIA receiver
- h. LVTTL transmitter disable input and transmitter fault output
- i. Hot pluggable capability

- j. LVPECL compatible data input/output interface
- k. SC Receptacle optical connector
- l. Compliant with ROHS standard
