Type-C to RJ45 Gigabit Ethernet

## Variants

DT-2951

## Details

### **Type-C to RJ45 Gigabit Ethernet Adapter – High-Speed Wired Connectivity for Modern Devices**

#### **Product Description:**

Enhance your internet experience with the **Type-C to RJ45 Gigabit Ethernet Adapter**, designed to provide fast and stable wired connections for USB- C enabled devices. Ideal for laptops, tablets, and smartphones lacking built- in Ethernet ports, this compact adapter ensures seamless connectivity for activities like streaming, gaming, and large file transfers. Its plug-and-play functionality eliminates the need for additional drivers, making it a convenient solution for both home and professional use.

#### **Key Features:**

1. **Gigabit Ethernet Speed:** Supports 10/100/1000 Mbps network speeds, delivering high-speed data transfer for smooth online experiences.
2. **USB-C Compatibility:** Works with a wide range of USB-C devices, including MacBooks, Chromebooks, iPads, Windows laptops, and more.
3. **Plug & Play:** No additional drivers required for most operating systems; simply plug in and connect.
4. **Compact & Portable Design:** Lightweight and easy to carry, making it perfect for travel and remote work.
5. **Durable Build:** Constructed with high-quality materials for longevity and reliable performance.

## **Advantages:**

1. **Stable Wired Connection:** Provides a consistent internet connection, reducing latency and avoiding interference common with Wi-Fi networks.
2. **Ideal for High-Bandwidth Activities:** Perfect for video conferencing, HD streaming, online gaming, and large file downloads/uploads.
3. **Enhances Device Connectivity:** Adds Ethernet functionality to modern devices that lack built-in ports, ensuring versatile usage.
4. **Energy Efficient:** Features low power consumption and built-in safeguards against overheating and overcurrent.
