

# Type-C to RJ45 Gigabit Ethernet

Type-C to RJ45 Gigabit Ethernet

## Variants

DT-2951

## Details

## Type-C to RJ45 Gigabit Ethernet Adapter

Enhance your internet experience with this Type-C to RJ45 Gigabit Ethernet Adapter, designed to provide fast, stable, and reliable wired connectivity for USB-C enabled devices. It is ideal for laptops, tablets, and smartphones without built-in Ethernet ports, ensuring smooth performance for streaming, gaming, and large file transfers.

## Key Features

Feature	Description
Network Speed	Supports 10/100/1000 Mbps Gigabit Ethernet
Compatibility	MacBook, Chromebook, iPad, Windows laptops, smartphones, and other USB-C devices
Installation	Plug & Play (no driver required for most systems)
Design	Compact, lightweight, and portable
Build Quality	Durable construction for long-term use

## Advantages

Benefit	Description
Stable Connection	Provides reliable wired internet with low latency compared to Wi-Fi
High Performance	Ideal for video conferencing, HD streaming, gaming, and large file transfers
Extended Connectivity	Adds Ethernet port to modern devices without LAN support
Energy Efficient	Low power consumption with protection against overheating and overcurrent
