Adapter for Media Converter – Reliable Power Supply

This adapter is designed to provide stable and efficient power to your fiber media converters. It ensures smooth operation and longevity of your networking equipment.

Key Features:

Input Voltage: 100–240V AC (compatible with international standards)

Output Voltage: Typically 5V or 12V DC (based on media converter model)

Power Rating: Matches most standard media converters (check your device specification).

Connector Type: Barrel plug (compatible with standard media converters).

Built-in Protection: Short-circuit, over-voltage, and over-current protection.

Compact & Lightweight: Easy to carry and install.

Applications:

Ideal for powering fiber optic media converters used in network setups across offices, data centers, and telecom infrastructure.
