Details

The **Fusion Splicer Soft Carry Case** is a lightweight and practical carrying solution designed to safely transport and protect fusion splicer machines and accessories. Constructed from durable nylon material, it provides convenient storage, portability, and protection for technicians working in FTTH, ISP, telecom, and fiber optic maintenance environments.

With multiple storage compartments and a comfortable carrying design, this soft case helps keep fusion splicing equipment organized and protected during transportation between project sites and service locations.

Material

Nylon

Design

Portable

Storage

Multi Pocket

Application

Fusion Splicer

Key Features

? Lightweight & Portable Design

? Durable Nylon Construction

? Multiple Storage Compartments

? Organized Tool & Accessory Management

? Protection Against Minor Impacts

? Comfortable Carrying Handle & Shoulder Strap

? Ideal For Daily Field Operations

? Suitable For Various Fusion Splicer Models

Technical Specifications

Parameter	Specification
Product Name	Fusion Splicer Soft Carry Case

Parameter	Specification
Product Type	Soft Carrying Case
Material	High-Quality Nylon Fabric
Storage Compartments	Multiple Internal & External Pockets
Protection	Protection Against Dust, Minor Impacts & Environmental Factors
Carrying Method	Handle & Shoulder Strap
Compatibility	Fusion Splicer Machines & Accessories
Application	Equipment Transport & Storage

Applications

- Fiber Optic Installation Projects
- FTTH Deployment Teams
- ISP Maintenance Operations
- Telecom Network Engineers
- Fusion Splicer Transportation
- Field Service Technicians

Compatible Brands

Suitable for carrying fusion splicers and accessories from **COMWAY, Fujikura, INNO, Sumitomo, Tumtec, FiberFox, UCL Swift, Skycom** and many other fusion splicer brands.

Note:

This soft carry case provides convenient transportation and basic protection for fusion splicer equipment. For maximum impact resistance during shipping or rugged environments, a hard carrying case is recommended.
