Drop Cable Splicing Protecting Box

The Drop Cable Splicing Protecting Box is designed for FTTH and last-mile fiber networks to securely protect fiber splice joints. It provides reliable protection against environmental factors while ensuring proper fiber management and easy maintenance.

Technical Specifications

Category	Specification
Product Type	Fiber Drop Cable Splice Protection Box
Application	FTTH, Last-mile Fiber Networks, Access Networks
Installation Type	Wall Mount (Indoor / Outdoor)
Function	Protects fiber splice joints
Protection	Dust-proof, Moisture-proof, Impact resistant
Material	Durable weather-resistant plastic
Environmental Use	Indoor & Outdoor
Fiber Management	Organized routing to maintain proper bend radius

Cable Entry	Secure cable entry & exit with fixation
Splice Support	Supports drop cable splicing
Maintenance	Easy access & installation
Durability	Long service life in harsh environments
