Details

Description:

The Fiber Optic Cross Cabinet is designed for connecting trunk and distribution optical fiber cables. It performs splicing, storage, and distribution functions and is primarily used in CATV, telecommunication, and network equipment rooms.

Features:

High-quality construction.

12 ports per tray.

Adapters installed at a 30-degree angle to prevent laser exposure to the eyes.

Easy operation and convenient maintenance.

Compatible with SC/UPC adapters.

General Specifications:

Dimensions: 550mm (L) × 310mm (W) × 1030mm (H) (144 ports total).

Accessories: Includes heat shrinkable protection sleeves.

Operating Temperature: -40°C to +60°C.

Relative Humidity: ≥95% (at 40°C).

Insulated Resistance: ≥2×10⁹ MΩ / 500V DC.

Applications:

Telecommunication systems.

CATV (Cable Television) networks.
