

4K HDMI Splitter

4K HDMI Splitter

Variants

DT-7144A(MS) 1x4

Details

The **4K HDMI Splitter** is a high-performance device designed to distribute a single HDMI input signal to multiple HDMI displays simultaneously without any loss in quality. It supports **Ultra HD 4K resolution**, delivering sharp images, vibrant colors, and crystal-clear audio, making it ideal for commercial and home applications.

This splitter is perfect for use in **showrooms, conference rooms, classrooms, control rooms, digital signage, CCTV monitoring setups, hotels, and home entertainment systems**. It ensures stable signal transmission and synchronized output across all connected displays.

Built with durable components and advanced signal processing technology, the 4K HDMI Splitter supports plug-and-play operation, requiring no additional software or configuration. Simply connect your HDMI source and displays to enjoy seamless high-definition video sharing.

Key Features

Supports **4K Ultra HD resolution (3840 × 2160)**

Distributes **one HDMI input to multiple HDMI outputs**

Maintains **high-quality video and audio without signal degradation**

Compatible with **HDMI 1.4 / 2.0** devices (model dependent)

Supports **3D, Full HD 1080p, and HDCP**

Plug and play – no drivers required
