LED Cable of Fujikura Series

LED Cable of Fujikura Series

Variants

80S 22S 62 Series 88/66S

Details

The **Fujikura Fusion Splicer LED Cable** is a replacement spare part designed for various Fujikura fusion splicer models. It connects and powers the LED indicator system and display-related components, ensuring proper machine status indication, warning notifications, and operational feedback during fiber splicing.

This cable is commonly replaced when the original LED connection becomes damaged, worn, or disconnected. Installing a new LED cable helps restore normal visual indication and diagnostic functions of the fusion splicer.

Product Type

LED Cable

Brand

Fujikura

Condition

Original

Stock

Available
