Details

AVAGO Series POF Patch Cord (HFBR4532-4532)

The AVAGO Series POF Patch Cord HFBR4532-4532 delivers low-loss, high-speed data transmission with strong resistance to electromagnetic interference. It is an ideal solution for short-distance communication applications where reliability, flexibility, and durability are required.

Key Features

Feature	Description
High Data Rate	Supports fast and stable data transmission for short-range communication.
Flexible Design	Easy to install and route in tight spaces.
EMI Resistance	Strong immunity to electromagnetic interference for reliable performance.
Durability	Robust construction ensures long-term stability and reliability.

Applications

Application	Description
Industrial Automation	Used in factory systems and machine communication.
Automotive Electronics	Suitable for in-vehicle data transmission systems.

Application	Description
Medical Equipment	Reliable for sensitive medical communication devices.
Security & Surveillance	Ideal for CCTV and monitoring systems.
Railway & Transportation	Used in signaling and communication systems.
