OFC One Click Cleaner

OFC One Click Cleaner

Variants

Cleaner LC Cleaner SC

Details

The **One-Click Fiber Optic Cleaner** is designed to remove dust, oil, and contaminants from fiber connector end faces. With a single push action, it provides fast, safe, and repeatable cleaning for stable optical signal performance.

It is widely used in **telecom, ISP, FTTH, data center, OTDR, optical power meter, patch panel, and equipment port maintenance**.

Models

SC / LC

Capacity

800+ Cleans

Method

Dry Tape

Use

Field Tool

Key Specifications

Feature	SC Cleaner	LC Cleaner
Connector Types	SC / ST / FC / E2000	LC / MU
Ferrule Size	2.5 mm	1.25 mm
Cleaning Capacity	800+ Cleans	800+ Cleans
Cleaning Method	Dry Micro-Fiber Tape	Dry Micro-Fiber Tape

Performance & Advantages

Precision Cleaning

Removes dust, oil, and particles without scratching the fiber end face.

Dual-Purpose Design

Cleans exposed connectors and adapters inside ports or patch panels.

Consistent Operation

Each push provides uniform cleaning with automatic tape advancement.

Anti-Static Protection

Helps reduce dust reattachment after cleaning.

Design Features

? Ergonomic body for comfortable field use

? One-click single action cleaning

? Automatic tape feeding system

? Low cost per cleaning cycle

? Integrated guide cap for accurate alignment

? Long usage life with 800+ cleanings

Applications

Patch Cord Cleaning

Equipment Ports

OTDR Ports

Power Meter Ports

FTTH Installation

ISP Maintenance

Data Center Network

Note:

Please choose the correct model before ordering: **SC Cleaner for 2.5mm connectors** or **LC Cleaner for 1.25mm connectors**.
