Details

One-Click Fiber Optic Cleaner (SC & LC Models)

The One-Click Fiber Optic Cleaner series is designed to maintain peak performance in fiber optic networks by removing microscopic dust, oil, and contaminants from connector end faces. A single push action ensures fast, reliable, and repeatable cleaning without damaging sensitive optical components.

This tool is widely used by technicians in telecom, ISP, data center, and FTTH environments where clean fiber connections are critical for stable signal transmission.

Key Specifications

Feature	SC Cleaner	LC Cleaner
Connector Types	SC, ST, FC, E2000	LC, MU
Ferrule Size	2.5 mm	1.25 mm
Cleaning Capacity	800+ Cleans	800+ Cleans
Cleaning Method	Dry Micro-Fiber Tape	Dry Micro-Fiber Tape

Performance & Advantages

Precision Cleaning

Specialized micro-fiber tape removes dust, oil, and particles without scratching the fiber end-face, ensuring stable signal performance.

Dual-Purpose Design

Extendable tip allows cleaning of both exposed connectors and adapters inside ports or patch panels.

Consistent Operation

Each push produces a uniform cleaning action with automatic tape advancement for reliable results every time.

Anti-Static Protection

Prevents static buildup, reducing the chance of dust reattachment after cleaning.

Design Features

Ergonomic body design for comfortable handling during field use

Single-action mechanism for fast and simple operation

Automatic tape feeding ensures a fresh cleaning surface every time

Low cost per cleaning cycle with long usage life

Integrated guide cap for precise connector alignment

Applications

Cleaning fiber connectors on patch cords and equipment ports

Maintenance of telecom, ISP, and FTTH networks

Use in data centers and enterprise networking environments

Essential tool for installation and troubleshooting technicians
