

OTDR Cleaner or OPM Cleaner

OTDR Cleaner or OPM Cleaner

Variants

OTDR+OPM

Details

OTDR Cleaner / Optical Power Meter (OPM) Cleaner

Professional-grade cleaning swabs designed for OTDR ports, Optical Power Meters, and fiber optic connectors. Ensures accurate measurement, low loss, and reliable performance by effectively removing dust, oil, and contamination from sensitive optical interfaces.

Key Features

Feature	Description
Ergonomic Snap Handle	Grooved handle design for easy snapping and precise cleaning control
Cleanroom Manufactured	Laundered and packed in Class 10 (ISO Class 4) cleanroom environment
Ultra-Low Contamination	Minimal particles, fibers, ions, and extractables
Soft & Non-Abrasive Tip	Safe for delicate optical ports without scratching
High Chemical Resistance	Compatible with IPA and cleaning solutions

Strong & Durable	Provides stable and effective cleaning performance
Adhesive-Free Design	Eliminates risk of glue contamination
Contamination-Free Material	Free from silicone, amides, and DOP

Applications

Use Cases
Cleaning of OTDR ports and adapters
Cleaning of Optical Power Meter (OPM) ports
Cleaning of fiber connectors (SC / LC / FC / ST)
Removing dust, oil, and residues
Applying IPA or cleaning liquids
Precision cleaning in critical optical environments
