Details

Erik Tools (Eriband Tools)

The **Erik Tools (Eriband Tools)** is a professional heavy-duty steel banding cutting tool designed for fast, safe, and efficient cutting of stainless steel banding straps. It is widely used in telecommunication, electrical power distribution, fiber optic installation, utility pole hardware installation, industrial maintenance, and construction projects.

Manufactured with a durable heavy-duty construction and ergonomic handle, this manual cutting tool provides excellent cutting performance while reducing operator fatigue. It is compatible with various sizes of stainless steel banding and is an essential tool for professional installers working in both indoor and outdoor environments.

Quick Specifications

Product Type

Banding Cutter

Operation
Manual

Material
Steel Banding

Applications
Telecom & Industrial

Key Features

- Professional steel banding cutting tool
- Designed for stainless steel banding straps
- Heavy-duty industrial construction
- High cutting efficiency
- Simple manual operation
- Comfortable ergonomic handle
- Safe and controlled cutting design
- Compatible with various steel banding sizes
- Suitable for indoor and outdoor applications
- Reliable tool for professional installers

Technical Specifications

Parameter	Specification
Product Name	Erik Tools (Eriband Tools)
Product Type	Steel Banding Cutting Tool
Application	Telecommunication, Electrical Installation, Industrial Applications
Primary Function	Cutting Steel Banding Straps
Material Compatibility	Steel Banding
Construction	Heavy-Duty Industrial Design
Design	Purpose-built for Safe & Efficient Cutting
Operation	Manual Hand Tool
Ergonomics	Comfortable Grip & Easy Handling
Usage Environment	Indoor & Outdoor Industrial Applications
Compatibility	Various Sizes of Steel Banding
Safety	Designed for Controlled & Safe Cutting

Applications

Telecommunication

Installation of ADSS fittings, fiber optic accessories, and utility pole hardware.

Electrical Installation

Securing cables, brackets, poles, cabinets, and industrial electrical equipment.

Industrial Projects

Steel band fastening for manufacturing plants, infrastructure, and maintenance work.

Outdoor Construction

Suitable for field installation in indoor and outdoor environments.

Important Note

Use the Erik (Eriband) Tool only for compatible steel banding straps. Always wear appropriate personal protective equipment (PPE) during operation and inspect the cutting blade before use. Proper handling helps ensure clean cuts, improves installation efficiency, and extends the service life of the tool.
