Details

Fiber Cleaver Blade for Fujikura (CT Series)

The Fujikura fiber cleaver blade is a high-precision replacement blade designed for accurate and consistent fiber cutting. It is compatible with popular Fujikura cleaver models such as CT-30, CT-08, and CT-06. With a long operational life and multi-position blade design, it ensures clean fiber end faces for low-loss splicing.

Key Features

High precision cutting for consistent fiber end face quality
Long blade life up to 48,000 cuts (multi-position usage)
Compatible with Fujikura CT-30, CT-08, and CT-06 cleavers
Rotatable blade positions to extend lifespan
Suitable for single fiber and ribbon fiber applications

Technical Specifications

Parameter	Specification
Product Type	Fiber Cleaver Blade

Parameter	Specification
Compatible Models	CT-30 / CT-08 / CT-06
Blade Life	Up to 48,000 cuts
Blade Type	Multi-position precision blade
Application	Optical fiber cutting before splicing

Available Brands

COMWAY, Fujikura, INNO, Sumitomo, Tumtec and other leading brands

Channel Options

1 – 12 Fiber Channels
1 – 16 Fiber Channels
1 – 24 Fiber Channels

Note: Always select the correct cleaver blade model for your fiber cleaver. Using original blades is highly recommended to ensure accurate cutting performance and longer service life.
