Details

JETFIBER Fusion Splicer Series

JETFIBER X6+

High-end core alignment fusion splicer with **6 motor system** for maximum precision. Fast splicing around **6 seconds** and heating around **12 seconds**. Equipped with **high-capacity 8400 mAh battery** supporting long working cycles. Designed for **high-performance ISP, backbone, and heavy field use**.

JETFIBER X4+

Cost-effective fusion splicer with **stable PAS / core alignment performance**. Balanced speed and accuracy suitable for **daily FTTH and installation work**. Compact and reliable design for **technicians and service teams**.

JETFIBER H5+

Compact and lightweight core alignment fusion splicer for easy portability. Fast **5 seconds splicing** and **12 seconds heating** with low splice loss (~0.02 dB SM). Supports **650× magnification, dual camera view, and 240+ splice cycles battery**. Ideal for **FTTH, maintenance, and field technicians**.
