

WIFI-6 AC1200 Router JIR-AC654R

WIFI-6 AC1200 Router JIR-AC654R

Details

WiFi-6 AC1200 Router JIR-AC654R

The JIR-AC654R WiFi-6 AC1200 Router is designed to deliver high-speed wireless connectivity, intelligent bandwidth control, and advanced security for homes, offices, and enterprise networks. With a powerful processor and dual-band performance, it ensures stable and efficient network operation.

Key Features

Feature	Description
High Performance CPU	Up to 1.0 GHz processor with ~1600 DMIPS for stable and fast processing
QoS Bandwidth Control	Intelligent traffic prioritization to optimize bandwidth usage
Multi-level Security	Supports IP/MAC filtering, SSID hiding, and advanced encryption
2T2R Technology	Dual transmit and receive streams for improved wireless stability
Mesh & TR069 Support	Supports mesh networking and remote management (TR069)

Hardware & Wireless Specifications

Parameter	Specification
Chipset	RTL8197FH-VG4 + RTL8812FR + RTL8367RB-VC
Flash	8 MB
Memory	64 MB DDR2
Wireless Speed	2.4GHz: 300 Mbps (2x2) 5GHz: 867 Mbps (2x2)
Antenna	4 x 5 dBi External Antennas
Interface	1 x GE WAN + 3 x GE LAN
Buttons	RESET x1, WPS x1
LED Indicators	Power, WAN, 2.4G, 5G, WPS
WiFi Standard	IEEE 802.11 b/g/n/ac
MIMO	MU-MIMO

System & Environment

Parameter	Specification
Working Modes	Router / AP / Relay
Management	Web UI Remote Management
MTBF	> 20,000 Hours
Power Consumption	? 9W
Power Adapter	DC 12V / 1A
Working Temperature	0°C to +40°C

Parameter	Specification
Storage Temperature	-40°C to +70°C
Humidity	10%–95% (non-condensing)
