Charger of INNO Series

Charger of INNO Series

Variants

19V 3A

Details

INNO Original AC/DC Adapter Charger (19V 3.42A)

The **INNO Original AC/DC Adapter Charger** is a genuine power supply designed specifically for INNO fusion splicer machines. It provides stable power output, reliable charging performance, and full compatibility with various INNO splicer models, ensuring safe and efficient operation during fiber optic installation and maintenance work.

Manufactured for professional fiber optic applications, this original charger delivers consistent voltage regulation and dependable performance, making it an ideal replacement or backup power adapter for field technicians and service centers.

Category	Specification
Product Name	INNO Original AC/DC Adapter Charger
Product Type	Fusion Splicer Power Adapter / Charger
Output Voltage	19V DC
Output Current	3.42A
Brand	INNO / Optoelecs

Category	Specification
Original Product	Yes, Genuine Original Charger
Compatible Models	INNO IFS-9, IFS-10, IFS-15, IFS-15A, View 3, View 5, View 7
Application	Power Supply & Battery Charging for Fusion Splicer Machines
Performance	Stable Voltage & Current Output for Reliable Operation
Package Dimensions	22 × 10 × 8 cm
Package Weight	1.5 kg
Shipping	Free Shipping Available
Usage	Replacement Charger or Spare Adapter for INNO Fusion Splicers
Applications	Fiber Optic Installation, ISP Networks, FTTH Projects, Telecom Ma

Note: This is an original INNO charger designed to provide safe and reliable power for compatible INNO fusion splicer models. Using genuine adapters helps ensure stable performance and extends equipment lifespan.
