LCD/ Display Cable of tumtec

LCD/ Display Cable of tumtec

Variants

A Series

Details

The **Tumtec LCD / Display Cable** is a replacement internal connection cable designed for Tumtec fusion splicer machines. It connects the LCD display module to the internal electronics of the fusion splicer, allowing the screen to receive power and signal correctly.

This cable is important when the display connection is damaged, loose, or malfunctioning. Replacing the LCD/display cable can help restore menu display, fiber image viewing, splicing information, and normal screen operation without replacing the full display assembly.

Product Type	**LCD Cable**
Brand	**Tumtec**

Compatibility

A Series

Warranty

7 Days

Key Features

? Direct Replacement Display Cable

? Reliable Signal & Power Transmission

? Helps Restore LCD Screen Display

? Suitable for Tumtec Fusion Splicer Repair
