Product Description — LCD/Display Cable of Tumtec

The **LCD/Display Cable of Tumtec** is a **replacement internal connection cable** designed for **Tumtec fusion splicer machines**. It links the **LCD display module** of the fusion splicer to the device's internal electronics, ensuring that the screen receives power and signal so it displays menus, fiber images, and splicing information correctly. This cable is essential for repairing or replacing a damaged or malfunctioning display connection in compatible Tumtec splicer models.

Features & Benefits:

Direct Replacement Cable: Designed specifically for Tumtec fusion splicer displays, making replacement and repair straightforward.

Reliable Signal & Power Transmission: Ensures the LCD screen functions properly by maintaining stable electrical connections.

Compatible Options: Available in **A Series** variants to fit different Tumtec models (select the correct series for your unit).

High-Quality Part: Helps restore the splicer's display functionality without needing a full display assembly replacement.

Warranty & Return Policy: Sold with a **7-day replacement** policy and **seller warranty** through D-TECH TRADING.
