Details

Tumtec TPW-52 Battery for Fusion Splicer (FST Series)

The Tumtec TPW-52 rechargeable battery is designed for Tumtec fusion splicer machines, providing stable and reliable power for field fiber optic splicing operations. It is widely used by technicians, ISPs, and telecom professionals for uninterrupted performance during installation and maintenance work.

Key Features

High-quality rechargeable battery for Tumtec fusion splicers
Stable power supply for consistent splicing performance
Suitable for field and outdoor fiber installation
Reliable backup power for telecom and ISP applications

Technical Specifications

Parameter	Specification
Model	TPW-52

Product Type	Rechargeable Fusion Splicer Battery
Capacity	5200 mAh
Application	Fusion Splicer Power Supply
Compatible Models	FST-16S, 16H, 18S, 18H, 83A, 83S, A9 Series

Package Includes

1 × Tumtec TPW-52 Battery

Note: Please confirm compatibility with your fusion splicer model before purchase to ensure proper performance.
